

Money Laundering, Terrorism and Proliferation Financing Risk and Control Module for Electronic Money, Foreign Exchange, Money Remitters, Foreign Exchange and Payment Service Providers

Electronic money institutions, foreign exchange dealers, money remitters and payment service providers are highly attractive to organised criminal networks because they enable the rapid movement of funds across borders, currencies and digital platforms often with limited face-to-face interaction and high transaction volumes.

Criminals may exploit these services to place, layer and integrate illicit funds through complex payment chains, prepaid instruments, virtual accounts, or cross-border remittance networks that obscure the origin and destination of money. To counter these threats, it is vital that these providers maintain a robust, enterprise-wide money laundering, terrorism and proliferation financing risk assessment framework.

By systematically identifying and understanding their exposure to financial crime risks and assessing the design and operational effectiveness of mitigating controls in a manner proportionate to their business model, size and complexity, they can strengthen regulatory compliance, protect consumers and uphold the integrity and trust essential to global payment ecosystems.

About Arctic Intelligence's Risk Assessment Platform

Arctic Intelligence's [Risk Assessment Platform](#) can be used by smaller reporting entities out-of-the-box with standardised risk and control libraries or configured by medium and larger enterprises to suit any enterprise risk management framework.

Our multi-award-winning platform is highly-configurable and can be tailored to suit your methodology, risk indicators, applying risk and/or control weightings as appropriate, with a full audit trail and real-time data aggregation of individual business lines or consolidated across enterprises.

Who is this risk and control module designed for?

The money laundering, terrorism and proliferation financing risk and control module contains a library of risks, controls and control tests designed specifically for different types of Electronic Money, Foreign Exchange, Money Remitters, Foreign Exchange and Payment Service Providers:

- ✔ **Electronic Money and E-money Service Providers**
- ✔ **Foreign Exchange Businesses**
- ✔ **Money Services Businesses and Money Remitter**
- ✔ **Payment Service Providers**

What's included in the risk and control module?

Each of our expert-designed risk modules contain an Enterprise-Wide Risk Assessment, a Channel Risk Assessment, a Product Risk Assessment and a Country Risk Assessment containing hundreds of risk indicators and risk factors, grouped under different risk categories and risk groups.

In addition to a fully comprehensive risk library, our module also contains a library of controls and control tests that you can use to assess the design and operational effectiveness of your control environment.

Our content modules can be used out-of-the-box, easily modified to suit your requirements or you can simply build and import your own risk and control content. We can support implementation directly or through our growing advisory network.

What's the structure of the risk and control module?
